CPC COOPERATIVE PATENT CLASSIFICATION

C21B MANUFACTURE OF IRON OR STEEL (preliminary treatment of ferrous ores or scrap C22B 1/00; electric heating H05B)

NOTE

This subclass <u>covers</u> the production of iron or steel from source materials, e.g. the production of pig-iron, and apparatus specially adapted therefor, e.g. blast furnaces, air heaters (furnaces in general <u>F27</u>).

3/00	General features in the manufacture of pig-iron	9/04	• • with combustion shaft
	(mixers for pig-iron <u>C21C 1/06</u>)	9/06	Linings
3/02	 by applying additives, e.g. fluxing agents 	9/08	 Iron hot-blast stoves
3/04	 Recovery of by-products, e.g. slag 	9/10	• Other details, e.g. blast mains
3/06	Treatment of liquid slag (slag wool <u>C03B</u> ; slag stones <u>C04B</u>)	9/12	• • Hot-blast valves or slides for blast furnaces (valves in general <u>F16K</u>)
3/08	Cooling slag	9/14	Preheating the combustion air
3/10	Slag pots; Slag cars	9/16	. Cooling or drying the hot-blast
5/00	Making pig-iron in the blast furnace	11/00	Making pig-iron other than in blast furnaces
5/001	 {Injecting additional fuel or reducing agents} 	11/02	in low shaft furnaces {or shaft furnaces}
5/002	• • {Heated electrically (plasma)}	11/06	• in rotary kilns
5/003	• • {Injection of pulverulent coal}	11/08	• in hearth-type furnaces
5/004	{Injection of slurries}	11/10	in electric furnaces
2005/005	• • {Selection or treatment of the reducing gases}	12/00	
5/006	• {Automatically controlling the process}	13/00	Making spongy iron or liquid steel, by direct
5/007	• {Conditions of the cokes or characterised by the	12/0006	processes
	cokes used}	13/0006	• {obtaining iron or steel in a molten state}
5/008	• {Composition or distribution of the charge}	13/0013	• • {introduction of iron oxide into a bath of molten
5/02	. Making special pig-iron, e.g. by applying additives,	12/002	iron containing a carbon reductant}
	e.g. oxides of other metals	13/002	{Reduction of iron ores by passing through a
5/023	• • {Injection of the additives into the melting part}	12/0026	heated column of carbon}
5/026	• • • {of plastic material}	13/0026	 {introduction of iron oxide in the flame of a burner or a hot gas stream}
5/04	Making slag of special composition	13/0033	• {In fluidised bed furnaces or apparatus containing a
5/06	• Using top gas in the blast furnace process (in coke	13/0033	dispersion of the material
	ovens C10B)	13/004	• {in a continuous way by reduction from ores}
7/00	Dlast former and difference sixted social blast former	13/00/16	(making metallised agglomerates or iron oxide)
7/00	Blast furnaces (lifts associated with blast furnaces	13/0046	• {making metallised agglomerates or iron oxide}
	<u>B66B 9/06</u>)	13/0053	• • {On a massing grate}
7/002	B66B 9/06) • {Evacuating and treating of exhaust gases}		• {On a massing grate}• {Starting from ores containing non ferrous metallic
7/002 7/005	B66B 9/06){Evacuating and treating of exhaust gases}• {Bleeder valves or slides}	13/0053 13/006	. {On a massing grate}. {Starting from ores containing non ferrous metallic oxides}
7/002 7/005 7/007	 B66B 9/06) Evacuating and treating of exhaust gases} {Bleeder valves or slides} {Controlling or regulating of the top pressure} 	13/0053	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous
7/002 7/005 7/007 7/02	 B66B 9/06) {Evacuating and treating of exhaust gases} {Bleeder valves or slides} {Controlling or regulating of the top pressure} Internal forms 	13/0053 13/006 13/0066	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant}
7/002 7/005 7/007 7/02 7/04	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B)	13/0053 13/006 13/0066 13/0073	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases}
7/002 7/005 7/007 7/02 7/04 7/06	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces	13/0053 13/006 13/0066 13/0073 13/008	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents}
7/002 7/005 7/007 7/02 7/04 7/06 7/08	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings	13/0053 13/006 13/0066 13/0073 13/008 13/0086	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores}
7/002 7/005 7/007 7/02 7/04 7/06 7/08 7/10	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings • Cooling; Devices therefor	13/0053 13/006 13/0066 13/0073 13/008 13/0086 13/0093	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores} {Protecting against oxidation}
7/002 7/005 7/007 7/02 7/04 7/06 7/08 7/10 7/103	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings • Cooling; Devices therefor • • {Detection of leakages of the cooling liquid}	13/0053 13/006 13/0066 13/0073 13/008 13/0086 13/0093 13/02	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores} {Protecting against oxidation} in shaft furnaces
7/002 7/005 7/007 7/02 7/04 7/06 7/08 7/10 7/103 7/106	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings • Cooling; Devices therefor • • {Detection of leakages of the cooling liquid} • • {Cooling of the furnace bottom}	13/0053 13/006 13/0066 13/0073 13/008 13/0086 13/0093	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores} {Protecting against oxidation} in shaft furnaces {wherein iron or steel is obtained in a molten
7/002 7/005 7/007 7/02 7/04 7/06 7/08 7/10 7/103 7/106 7/12	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings • Cooling; Devices therefor • • {Detection of leakages of the cooling liquid} • • {Cooling of the furnace bottom} • Opening or sealing the tap holes	13/0053 13/006 13/0066 13/0073 13/008 13/0086 13/0093 13/02 13/023	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores} {Protecting against oxidation} in shaft furnaces {wherein iron or steel is obtained in a molten state}
7/002 7/005 7/007 7/02 7/04 7/06 7/08 7/10 7/103 7/106 7/12 7/125	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings • Cooling; Devices therefor • • {Detection of leakages of the cooling liquid} • • {Cooling of the furnace bottom} • Opening or sealing the tap holes • • {Refractory plugging mass}	13/0053 13/006 13/0066 13/0073 13/008 13/0086 13/0093 13/02 13/023	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores} {Protecting against oxidation} in shaft furnaces {wherein iron or steel is obtained in a molten state} {heated electrically}
7/002 7/005 7/007 7/02 7/04 7/06 7/08 7/10 7/103 7/106 7/12 7/125 7/14	B66B 9/06) • {Evacuating and treating of exhaust gases} • • {Bleeder valves or slides} • {Controlling or regulating of the top pressure} • Internal forms • with special refractories (refractory materials C04B) • • Linings for furnaces • Top armourings • Cooling; Devices therefor • • {Detection of leakages of the cooling liquid} • • {Cooling of the furnace bottom} • Opening or sealing the tap holes • • {Refractory plugging mass} • Discharging devices, e.g. for slag	13/0053 13/006 13/0066 13/0073 13/008 13/0086 13/0093 13/02 13/023	 {On a massing grate} {Starting from ores containing non ferrous metallic oxides} {Preliminary conditioning of the solid carbonaceous reductant} {Selection or treatment of the reducing gases} {Use of special additives or fluxing agents} {Conditioning, transformation of reduced iron ores} {Protecting against oxidation} in shaft furnaces {wherein iron or steel is obtained in a molten state} {heated electrically} in retorts
